

# STAY CONNECTED. FEEL SECURE.

## Doro Aurora A10

Our most compact smartphone

### WHY DORO

At Doro, we design technology to help people overcome the various challenges that life can bring, whether brought on by ageing, cognitive decline or physical impairments. We believe everyone should be able to stay connected with the people they love, do the things they enjoy, and feel safe. Day after day. That's why our smartphones are designed with thoughtful and unique features that help maintain social connections and support your daily well-being, all while offering robust, easy-to-use functionality.

### DORO SECURE BUTTON

Doro brings you much more than a great smartphone. Just one press of our signature Doro Secure Button™ with the green ring sends an alarm with your location to a list of people you rely on, sounding a distinct signal on their phones even if placed in 'Do not disturb' mode. And with related apps such as Response by Doro® and TeamViewer that enable trusted relatives or friends to quickly and easily assist you from anywhere, your support network is always close by. Bringing peace of mind for you, and for them.

### DORO EASY INTERFACE

"Easy" is in our DNA. It's why our smartphones come with an intuitive interface that avoids clutter and prioritises you. From organising and accessing your apps, to customising the phone to suit your needs, Doro Easy Interface™ with helpful guides makes enjoying your phone both safe and simple. As do the tactile buttons for answering and rejecting calls, and for Home. The Home button can be used to access Google Assistant / Gemini, and the green Doro Easy Call button for direct dialling a favourite contact.

### DORO CLEAR SOUND

We care a lot about the sound you hear. And don't hear. That's why the receiver and audio technology in our phones are specially adjusted and tuned to emphasise tones and frequencies that can be harder to perceive. Especially for people with hearing impairments. In addition, our unique ClearSound® setting makes speech easier to understand and is ideal for anyone who struggles with hearing phone conversations, particularly in noisy environments.

<b>General</b>
